No salmon PSC limits apply to all trawl fisheries in the GOA.

August 25, 2012, Amendment 93 implemented Chinook salmon PSC limits in the GOA pollock fisheries. See car140\_goa\_non\_sb.pdf

Other hook-and-line fisheries means all hook-and-line fisheries except sablefish and demersal shelf rockfish in the Southeast District. The hook-and-line sablefish fishery is exempt from halibut PSC limits.

Halibut mortality for the demersal shelf rockfish fishery in Southeast District is not listed due to insufficient observer coverage.

Data is based on observer reports extrapolated to total groundfish harvest. Estimates for all weeks may change due to incorporation of late or corrected data.

Trawl halibut PSC limit data include catch from Rockfish Program cooperatives.
